Project Details:

Project Title: Devil's Canyon Ram Collaring Data Fee

Project Type: Research

Affiliate: Wyoming Game & Fish Dept.

Project Location: Lovell

Project Description: In Feb 2017, WGFD (with WY-WSF funds) successfully deployed 4 Telonics GPS collars on rams west of Devil's Canyon. Please see the attached map for the 1st 10 days of locations for one ram. The subscription fees to download the GPS data are paid for 1 year (Jan 2017-Jan 2018). The operational life of these collars is at least 3 years.

Project Problem: The population of bighorn sheep in Devil's Canyon are expanding their distribution. Understanding the movement of sheep between Devil's Canyon, the Bighorn Canyon National Recreation Area, and Montana's Pryor Mountain herd, will help inform management decisions.

Problem Solution: Paying the subscription fee to download data from 4 collars for 2 more years.

Biography Of Applicant:

Name: Leslie Schreiber

Address: 2104 Bear Creek Rd

City: Shell

State: WY

Zip: 82441

Phone: 307-251-9870

Fax:

E-mail: leslie.schreiber@wyo.gov

Current Member: Yes

Cost To Be Funded

Equipment.....0.....	\$
Services.....0.....	\$
Publishing.....0.....	\$
Monitoring.....200 (fee) x 4 collars x 2 years = 1600.....	\$
Supplies.....0.....	\$
Other.....0.....	\$
Totals \$.....1600.....	\$
