ORGANIZATION INFORMATION	
Wyoming Wild Sheep Foundation	<b>Project Lead:</b> Mr. Steve Kilpatrick
P.O. Box 12 Moose, WY 83012	<b>Phone:</b> 307-413-7249
Mission	
Putting and Keeping Sheep On The Mountain	

PROJECT INFORMATION
<b>Requested Amount:</b> \$4,200.00
<b>Program Name:</b> Remote Camera w/ Cellular Capability
Species Breakdown
BHS - \$3,000 Moose \$600 Elk - \$600

PROPOSAL NARRATIVE
Description
<p>This project is requesting funds to purchase two remote sensing cameras with cellular capability to record and transmit digital images of wildlife utilizing habitat enhancement projects. The camera model selected is capable of transmitting images to 4 cell phones and 2 computers. Examples of habitat enhancements include guzzlers, prescribed burns, wild fires, wildlife-friendly fence modifications, conservation easements, conserved travel corridors, protected winter ranges, etc.</p> <p>Individuals will be carefully selected to receive the sometimes sensitive images and use them appropriately for public outreach and education. Emphasis will be placed on the education aspects of the above habitat enhancement examples. Examples of image sharing and coordination include: local schools, local and statewide media, conservation and hunting organizations, social media, elected officials, WGFD, Forest Service, BLM, national and state parks, State Office of Tourism, town councils, etc.</p>
PROJECT READINESS
Totally ready.
Project Objectives
Objectives are:  1) Document the level and type of wildlife use associated with habitat enhancements using digital imaging.  2) Effectively share appropriate digital images with the general public.  3) Raise the awareness, through coordinated image sharing and education, and gain support for Wyoming's habitat/wildlife conservation.
Budget Narrative
The attached budget provides details relative to the two cameras and necessary accessories need to properly install and keep them as secure as possible. While the emphasis will be primarily on BH sheep, other species will benefit

from the management practices and be camera trapped. Thus, we have asked for minor contributions from moose and elk (i.e. \$600/ea).

Budget - Reconyx Remote Camera W Cellular Capability

<b>Item</b>	<b>Price Ea.</b>	<b>Quantity</b>	<b>Total</b>
PC900C HyperFire Cellular Professional Covert Camera Trap	\$1,250	2	\$2,500
32GB Reconyx Certified SDHC Memory Card	\$40	4	\$160
NiMH AA 12-Pack batteries	\$40	3	\$120
Solar Panel Power Unit	\$300	2	\$600
Python Professional with 6' Cable	\$30	2	\$60
HYPERFIRE HEAVY DUTY SECURITY ENCLOSURE WITH SWIVEL KIT	\$140	2	\$280
Verison Data Service/month - 4 phones and 2 computers	\$20	24	\$480
		<b>TOTAL</b>	<b>\$4,200</b>
