**Project Details:**

Project Title: Newcastle Domestic Goat Mitigation  
Project Type: Disease management  
Affiliate: WY-WSF,  
Project Location: NW of Newcastle, Oil Creek Drainage  
Project Description: Over the past couple of years the WGFD has lethally removed 5 BHS rams NW of Newcastle in the Oil Creek drainage area due to disease concerns after they were observed in close proximity/contact with domestic goats. Two producers and 12-15 goats are involved. WGFD personnel, Wy Game and Fish Dept Commissioner Keith Culver and WY-WSF are currently evaluating alternatives( i.e. disease testing, fencing, goat buyout) to minimize or eliminate the risk of lethal pathogen transmission from domestic goats to wild sheep. Once one or more alternatives are selected, Culver will approach the producers with viable alternatives to gain their thoughts and recommendation. The timeline is early summer through fall, 2018. With this proposal, we are asking that the WY-WSF set aside funds to implement one or more of the alternatives - disease testing, fencing, goat buyout.  
Project Problem: The problem to be solved is the minimization/elimination of lethal pathogen transfer from two smaller herds of domestic goats to wild sheep, thus, eliminating the lethal removal of wild sheep which wonder near the two goat herds.  
Problem Solution: The problem will be solved by one of more of the actions; disease testing, fencing, goat buyout.

**Biography Of Applicant:**

Name: Steve Kilpatrick  
Address: PO Box 12  
City: Moose  
State: WY  
Zip: 83012  
Phone: 3074137249  
Fax:  
E-mail: [skilpatrick@wyomingwildsheep.org](mailto:skilpatrick@wyomingwildsheep.org)  
Current Member: Yes

**Cost To Be Funded**

Equipment.....\$  
Services.....\$  
Publishing.....\$  
Monitoring.....\$  
Supplies.....\$  
Other.....Disease testing, fencing, goat purchase \$6,000.....\$To be determined  
Totals \$.....\$6,000.....\$to be determined
